

Key Features

- Pre-bagged fiber and copper assemblies
- Labeled and serialized to match rack plans
- Includes layout documentation and checklists
- Built to your deployment spec
- U.S. production for consistent supply
- Quick-turns in less than 10 business days

Ideal Applications

- Hyperscale POD or row deployments
- Data center rack kits for integrators
- AI cluster installation bundles

Additional Benefits

- Simplifies field work with clearly labeled, step-by-step bagged assemblies
- Reduces human error with coordinated labeling and documentation
- Speeds up installation by eliminating guesswork and ad hoc planning
- Improves consistency across sites, racks, and deployment teams
- Enhances operational efficiency for repeatable, large-scale rollouts
- Reduces waste by shipping only what's needed per rack or POD

Custom Deployment Kits (Pre-Bagged Fiber + Copper)

Our custom deployment kits package fiber and copper assemblies together for POD, rack, or row deployments. Pre-labeled, serialized, and organized by install order, these kits reduce field labor and speed up turn-ups.
