

Key Features

- LC/UPC or LC/APC connectors
- Custom lengths from 1m to 50m+
- Riser-rated, outdoor-rated, or armored jacket options
- 100% tested and certified
- U.S.-based production for fast fulfillment

Ideal Applications

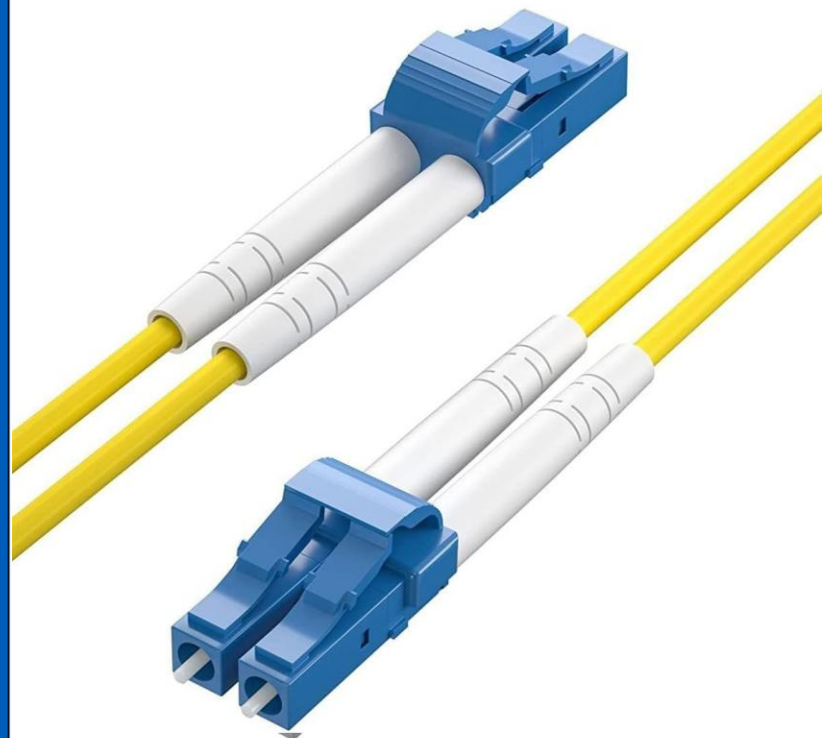

- Central office patching
- MDU and FTTH network builds
- Rack-to-rack fiber connections

Additional Benefits

- Simplifies inventory management with flexible length options and jacket types to fit a range of deployment needs
- Minimizes signal loss with tightly controlled end-face geometry and factory-polished connectors
- Reduces network downtime with durable construction designed to withstand daily handling and re-patching
- Speeds up identification during installs or maintenance with optional custom labeling and color-coded boots
- Streamlines technician training through standardized assembly and proven connector reliability

LC-LC Fiber Jumpers (Indoor/Outdoor Rated)

Amphenol Custom Cable's LC-LC Fiber Jumpers are built for versatility, offering a reliable patch solution for both indoor and outdoor fiber networks. Whether deployed in a central office, MDU, or outside plant setting, these high-performance jumpers ensure consistent signal integrity across every connection point.
