

Key Features

- MPO-12, MPO-16 or MPO-24 connectors, OS2/OM4 fiber
- Custom lengths with pulling eyes available
- Serialized and labeled for easy deployment
- U.S. production for fast lead times
- AI and GPU cluster optimized
- Quick-turns in less than 10 business days

Ideal Applications

- GPU cluster cabling
- Hyperscale data center spine/leaf interconnects
- High-density server room deployments

Additional Benefits

- Reduced installation time through plug-and-play connectivity
- Optimized cable management for high-density rack environments
- Minimized error risk with factory pre-terminated and tested assemblies
- High signal integrity ensures peak performance in demanding environments
- Space savings in trays, panels, and conduits with compact MPO format
- Easy traceability with serialized labeling and documentation

MPO-24 / MPO-16 / MPO-12 High-Density Trunk Assemblies (OS2/OM4)

Our MPO-24, MPO-16 and MPO-12 trunks power the world's largest AI and data center networks. Available in custom lengths, pre-labeled, and fully tested, these assemblies speed up cluster builds and reduce deployment time.
