

Key Features

- MPO-12/16/24 to LC duplex breakout
- Staggered or straight fanouts
- Polarity options (A, B, C)
- Pre-labeled and serialized
- U.S.-made, ready to deploy
- Quick-turns available in less than 10 business days

Ideal Applications

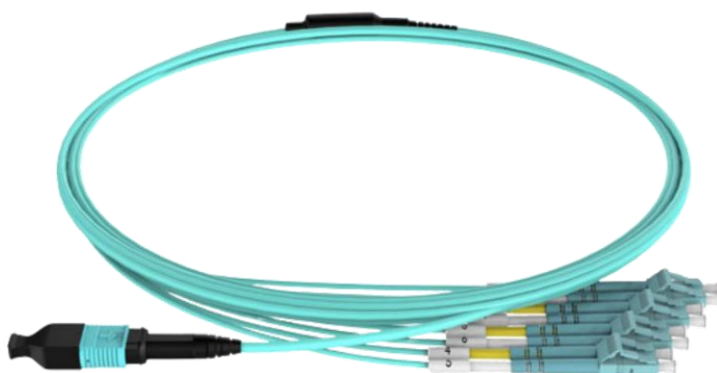

- Rack-to-server patching
- Top-of-rack and end-of-row deployments
- AI and data center patch fields

Additional Benefits

- Reduced cable bulk for improved airflow and thermal efficiency
- Faster deployment with plug-and-play installation
- Minimized error risk through labeled and serialized leg identification
- Built-to-length options reduce excess slack and eliminate field terminations
- Improved rack aesthetics and cable organization
- Bend-insensitive options available for tight routing within enclosures

MPO-to-LC Breakout Harnesses (Rack to Server)

Our MPO-to-LC harnesses deliver clean, labeled fanout solutions for high-density server or switch patching. Designed for exact rack layouts, these assemblies simplify installation and optimize airflow.
