

Applications

- FTTH installers can easily push cable through walls using our wand.
- The insertion wand is glow-in-the-dark, enhancing visibility in dark or enclosed spaces.
- Pre-Terminated Fiber Drops

Key Features

- Eliminates Mechanical Splicing
- Maintains Factory-Terminated Connectors for Low Signal Loss
- Saves Hours of Labor Per Installer
- Hook Loop for Easy Fishing/Pulling Through Walls
- Glow-in-the-Dark for Enhanced Visibility in Dark Spaces
- Minimizes Wall Penetration Size
- Lightweight, Compact, and Flexible
- Reusable Tool for 500+ Installations
- Eco-Friendly and Waste-Reducing

Specifications

- Lengths offered: 8 & 12 in.
- Compatible with Standard Pre-Terminated Connectors (SCA/SCU)
- Supports 4.8mm Indoor/Outdoor Fiber Assemblies
- Available in White, Off-White, and Black
- Customizable Lengths for Provider Needs
- Temperature Range: 40 to 85°C

Performance

- Maintains Signal Integrity and Reduces Loss
- Protects Against Physical Damage, Dirt, and Moisture

Environmental Features

- UV-Resistant Polycarbonate Material
- Reusable Design to Reduce Waste

Configurations

- Multiple Diameter Options for Various Connector Types

No Special Tools Required for Installation

The Fiber Wand

The Fiber Wand from Amphenol Custom Cable is a revolutionary solution for FTTH installations, saving installers hundreds of hours while ensuring superior connection quality. By preserving factory-grade terminations and eliminating mechanical splicing, it guarantees low signal loss and exceptional performance for subscribers. The glow-in-the-dark design improves visibility in tight spaces, and the built-in hook loop makes fishing through walls effortless. Paired with drop cables available in multiple lengths and colors, the Fiber Wand transforms fiber installations into faster, cleaner, and more efficient processes using pre-terminated cables.
