

## Key Features

- Outdoor weatherproof or indoor-rated enclosures
- Pre-loaded with fiber adapters or splice trays
- Pole, wall, or pedestal mounting options
- Compact or high-capacity models available
- Built for FTTx and broadband deployment teams

## Ideal Applications

- FTTx drop terminations at the home or building
- Cabinet or pedestal fiber management
- MDU hallway or closet fiber terminations

## Additional Benefits

- Reduces troubleshooting time with clear internal layout and intuitive fiber routing paths
- Minimizes training requirements with standardized hardware and tool-friendly access points
- Improves fiber protection through integrated strain relief and bend radius control features
- Speeds up restoration during outages with accessible design and pre-configured components
- Supports long-term network reliability with robust materials that resist UV, impact, and moisture intrusion

## Wall & Pole Mount Fiber Termination Boxes / Enclosures

Designed for deployment flexibility and technician ease, Amphenol Custom Cable's Wall & Pole Mount Fiber Enclosures offer durable, organized solutions for managing fiber drops in the field. Whether used at the network edge or within an MDU, these enclosures streamline installs while protecting connections from the elements.
